Image Button

Hits: 959

Description: The script can be used to create image buttons that behave like standart buttons in a browser. If you move the mouse over the image button and press it, the image button will switch to pressed state. If you move the mouse in and out without releasing the mouse button, the image button will also follow the standard behavior. This behaviour is more difficult to implement than rollover effects, however it is much more natural.

Resource Specifications

Version:	1.01
Platform(s):	linux, windows, freebsd, sun
Date Added:	Jan 11th, 2008
Last Updated:	Jan 11th, 2008
