Silentum Counter Elite

Hits: 807

Description: If you're looking for a simple, customizable counter for your web site, this is the only one you'll need. This modification of Silentum Counter offers the same simplicity with its text based digits, but adds class by allowing you to change the font family, color, size, and whether or not the digits are bold or italic. It uses two text files to store the amount of hits and can be set up in a matter of minutes. Each of the two values are displayed in a fieldset tag, so you can pretty much stick it anywhere on your page without it looking out of place.
