RSS Entertainment Script Automated Games Videos Images

Hits: 490

Description: RSS Entertainment Script enables webmasters to create and maintain an automated entertainment website using RSS feeds specified by you from sites such as YouTube.com, MetaCafe.com, ShoutFile.com etc.

RSS Entertainment Script automatically gathers content from your feeds and updates your website database via "Cron Jobs" whenever you specify. You can set the update script to run everyday, every hour or even every minute, the choice is yours. You can also manually run the update script yourself if you do not want your site to be on auto pilot.
