VidImageSplitter

Hits: 409

Description: Do you have a favorite movie? May be you wanna publish most beautiful shots from that movie on your site? Then we'd recommend VidImageSplitter. You can convert either all or only specific frames of the movie to separate image files with this utility. Many output format are supported - jpeg, png, bmp, gif - whatever you want :) This program have a nice and pretty simple user interface so even child will be able to use it!
