Live Help Messenger Hosted

Hits: 621

Description: The Live Help Hosted solution is managed within a state-of-the-art data center. This allows you to concentrate on running your business rather than managing the infrastructure of a Live Help solution. A Live Help solution that allows you to chat with your browsing visitors. Includes many features; multiple chat requests, easily chat with multiple visitors simultaneously, instant messenger interface design, transfer guests between operators, online alerts/sound when guests are pending for support or receiving messages, editable language pack, daily transcripts / visitors report, Online / Offline / Be Right Back / Away status indicators, managed upgrades and the Live Help Messenger Windows application for your operators.
