Fusion Ticket

Hits: 2,060

Description: The full box office solution.

The ticket system can be used for disco's, theaters, parties, operas, school shows. We are a completely free open source box office solution which handles booking online ticket sales, box office and ticket takers.

Fully customisable seating charts and pdf tickets there isnt much you cant do with this software and even better were adding new features regularly!

Fusion Ticket is based on the old MyTicket platform. This new version brings new light to the old project.

Now with a new dev team, the script is fully php5 and mysql5 compliant.
