CPanel Backup Software - Data Protection & Backup Hits: 290

Description: CP Data Backup is a CPanel backup utility that automatically downloads the daily backup files in CPanel. CP Data Backup can archive websites by date and you can add unlimited websites and databases to be backed up. Runs while you sleep so you know your data is always safe from server crashes, hackers, data theft, or any other emergency that can happen, but you never expect. CP Data Backup installs easily and you can control all backup projects from a central location. Some of CP Data Backup's features include: create archived backups and name them according to the date they were created, back up your files to a password protected folder, or the root of your account, so they cannot be accessed from the web at all, backup files can be downloaded and deleted directly from the admin area, receive email notifications when a backup is performed and complete, and more. Stop depending on your hosting company to ensure your important data is safe. Make sure it is with CP Data Backup.
