# Ajax Chat

Hits: 2,258

**Description:** Ajax Chat is a free customizable web chat software implemented in JavaScript (client side) and PHP (server side). JavaScript XMLHttpRequest object is used to fetch new data from the server. The script implements public and private chat; logging in as a register user or as a guest; smileys; etc. Ajax Chat can be integrated with a third-party membership system by implementing user authentication routine. All data is stored in a text file (no database needed).
