# XFileSharing Professional

Hits: 304

**Description:** XFileSharing Professional script is an advanced solution for creating professional file sharing services. It can be installed on any virtual/shared or dedicated Linux hosting running Perl (most servers do). You can customize look and feel of your site with just editing HTML files and can place banners, adsense or other type advertisement on its pages.

In order to prevent content scrapping by internet crawlers (robots downloading files from your site), XFileSharing Pro have leech protection for download URLs. Person who will want to download some content, will need to enter text from image. You will be able to set up premium membership levels for your users and charge (PayPal) them monthly for premium access to uploaded content. If your site is very popular and have a lot of uploaders and downloaders - you able to add as many additional servers as you wish. XfileSharing Pro will use all power of your servers and will make upload/download process faster and safer.
