Refer Them! V2

Hits: 809

Description: Lots of sites have a Tell A Friend script, but how many of them reward visitors for telling a friend? Well, now yours can! Refer Them is a script much like a Tell A Friend script, but with so much more. Users have are required to refer 5 emails, and if they do they are redirected to a page to claim a gift. The gift can be anything from a coupon, to a free song, a custom message, or anything else you can dream up! A great way to say Thanks. AND, the script checks each email to make sure it is a valid domain, AND has a built in Email Guess feature to guess ahead from a list of almost 200 domains, to make it a faster, easier experience for your visitors.
