DCoM SWF Protector

Hits: 173

Description: DCoM SWF Protector is an ideal solution for you! It is ready to help you to protect your Flash developments codes from decompilers. Don't let anyone steal your developments, encrypt and protect your Flash SWF files with DCoM SWF Protector.

Using one or all the methods you can encrypt your ActionScript, confuse all the decompilers that will try to attack your development and in such a way your Flash file will be reliably protected.

- * Shaking - the method lies in mixing the source code. The method is very effective, but it causes the increasing of the file size.

- * Hiding - the main principle of the method is to hide the code. The method is very effective and doesn't cause the increasing of the file size.

- * Obfuscating - a well known method, that allows you to obfuscate the variable names, feature names, etc. in a definite way. The method should be used with caution since it may result in inoperability of separate program components.
