# Beginning ASP.NET the Easy Way

Hits: 262

**Description:** ASP.NET is Microsoft's extension to HTML. It requires an ASP.NET compatible web server. Such as, Abyss or IIS (Internet Information Services from Microsoft). There are however plug-ins for Apache Web Server also. Before you continue you will need to know VB.NET which is required for the scripting part of the tutorial.

You don't necessarily need a compiler to build an ASP.NET script. Any text editor will work. Let's start by building our first aspx file. Create a new text document in your favorite text editor. Call it default.aspx. Now lets jump in, shall we?
