Working Version Of Post Affiliate Free

Hits: 611

Description: If you've been looking all over for a usable version of Post Affiliate I think I have just what you need! This is the software that I personally use myself but I've decide to give it away for free. I had to hire a web designer to add a password retrieval feature and fix a couple of other things to make it usable. You can also view an affiliate's information when you owe them their commissions which you couldn't do before. This software works great if you're trying to run a simple affiliate program for a digital product, etc.
