SidSHARE Flash Media Upload Script

Hits: 457

Description: SidSHARE by SidStudios. This is a nifty little script which allows you and your visitors to upload Flash Media files to your webserver and share the file. It uses an advanced algorithm to MAKE SURE that no files are overwritten. This script is an evolved version of the original SidSHARE.

Coded completely in PHP, this script is definitely a complement to any website which is oriented around media-sharing or Flash movies and games.
