HtmlBox

Hits: 1,402

Description: Cross-browser interactive open-source HTML textarea built on top of the jQuery library. Tested with Mozilla Firefox, Inrernet Explorer, Opera, Netscape and Safari.

HtmlBox makes possible to convert any textarea and transform it into an easy to use HTML editor. The intuitive interface makes it easy to build small HtmlBoxes with just several buttons, or large full featured and nice looking HtmlBox editors. Since version 1.2 XHTML output is enabled.

The size of just 11 kb and outstanding performance makes HtmlBox a must have tool in the box of every JavaScript developer. The easy integrability puts HtmlBox ahead of the crowd and the preferred choice, when a rich text interface is considered for Content Management Systems, Buletting Boards, Forums, Guest Books, and others.

Resource Specifications
