# Schoorbs

Hits: 1,268

**Description:** Schoorbs is a free, GPL, system to make room and resource bookings through a WebGUI using PHP and MySQL/PostgreSQL. Schoorbs is a fork of MRBS. Since then various changes considering security, usability and portability were made.

Schoorbs has the following features:

- \* book rooms & resources grouped by areas
- \* activity could be log via a simple logging interface
- \* code is automatically tested by several unit tests
- \* easy stylable through the usage of a template system
- \* produces valid XHTML 1.1 output
- \* packages for Debian and Ubuntu are available
- \* well documented on the Schoorbs website
