# VMVSystems NetAdmin

Hits: 206

**Description:** VMVSystems NetAdmin is a software written completely with Delphi, includes common tools (Ping, Trace Route, Whois, Shares scanner, NetSend ), Scanners (Port, CGI, FTP, POP3, Port test), Traffic analyzer (sniffer). Compatible with Win 2k/XP/2003, does not require any external DLL's or drivers. Software can be used as standalone application, for learning purposes or using its code in your products. All main functionality was developed without using VCL. Application is fully functional, take a look and decide if you want its source.

Application is freeware, source code is very cheep...
