Debugging Server Side Functions

Hits: 49

Description: Checking your application is always a standard procedure in any language. In the case of Ajax, the importance is even greater considering the complexity of the development technique. When debugging the application, Ajax developers knows that they have to go for the Server-side functions as well as the client side. Fortunately, client side debugging tools are common. Firefox even has a small add-on that has the ability to debug Client-Side functions of Ajax. Just one run with the
