# Image Zooming And High Quality Rendering Software

Hits: 354

**Description:** The user moves the mouse pointer to the part of the image that he/she is interested in, zooms in, and voila! that part remains stationary. The default zooming device is the mouse scroll wheel. Turning the wheel by one position zooms the image by a zoom increment. Whether zooming is in or out depends on the mouse wheel's direction.

It also display a smaller version of the image in the corner of the panel.

## Resource Specifications

<b>Platform(s):</b>	windows
<b>Date Added:</b>	Apr 13th, 2008
<b>Last Updated:</b>	Apr 13th, 2008
