phpCheckZ

Hits: 187

Description: phpCheckZ is a web utility that allows you to create dynamic checklists for your website. Features: unlimited number of checklists (up to 250 fields per list), optional chart for each list, member system, bridge system (currently includes bridges for Simple Machines Forums SMF and phpBB 3.0.1).

Choose to display checklists on your website with a small snippet of code or use the backend as a frontend.
