## Full Email System - Start Your Own Email Service Like GMAIL Hits: 955

**Description:** If you've ever wanted to create a free email service such as Hotmail.com or Gmail.com, then this is the script for you. It's easy to setup and install, and you'll be ready to go literally within minutes. With our script, it's designed to model the state of the art advertising system that Gmail has implemented. In case you didn't know, Google displays their ads based on the emails received in the user's email boxes.

With our system, it's designed in the same way. Our system has Google AdSense built into it to display ads targeted specifically by the emails received in the user's inboxes. This will show highly relevant ads, increasing your CTR, and obviously your income.
