EasyWebFetch 1.0

Hits: 909

Description: This is a simple class for web fetching from your application. This class fetch a web page by opening socket connection to the remote host. The main benefit is it has no dependencies. This class is an alternative if your server doesn't have PHP with curl enabled, or the PHP configuration doesn't allow opening URLs with fopen(). Visit to see the demo.

Resource Specifications

Version:	1.0
Platform(s):	linux, windows
Date Added:	May 6th, 2008
Last Updated:	Jun 9th, 2008
