## Using JSP Tag Libraries for Ajax

Hits: 67

**Description:** JavaServer Pages or JSP is one of the small things Java has developed to aid the developers in building faster and better Java based applications. JavaServer Pages has the ability to built HTML documents every time they are requested by user or when triggered by the application. Through JSP, developers will have the ability to build a webpage that will not require a very strong bandwidth. A simple Java application will require the user an installed Java and a faster bandwidth
