# Login Generater

Hits: 462

**Description:** The simplest script to generate a login page that, after logged in, puts the page you wanted! Security level: Medium.

Why not high?

It does not use cookies.

Why not low?

Because it doesn't redirect you to the page requested ( really weak ), but it shows you the page that is after the login, in the same page!

Cookies aren't really more secure, but they are better.

All you have to do is follow a few steps and your login page is generated!
