Pixie - The Small, Simple, Site Maker

Hits: 2,795

Description: Pixie is an open source web application that will help you quickly create and maintain your own website. Many people refer to this type of software as a “content management system”, we prefer to call it a small, simple, website maker. Pixie has been designed to be simple to use and easy to develop for. More information is available at getpixie.co.uk and if you would like to try Pixie, visit the demo site at demo.getpixie.co.uk.
