## Database Backup Tool

Hits: 179

**Description:** It's easy to forget to backup your databases, or not do it because you don't want to bother with it today. The database backup tool makes it a lot easier to have peace of mind. You will be creating a backup on your local computer as well as uploading a backup to an FTP location, so you will have two backups. You can have an unlimited number of saved projects, so backing up all you databases is as easy as opening a project and making a couple of clicks. This application works with Windows XP and Vista, and may work with some older versions of Windows also. The host of your database must allow remote connections. Please make sure this is possible before purchasing the software. The tool connects to mySQL databases.

### Resource Specifications

<b>Version:</b>	1.2
<b>Platform(s):</b>	windows
<b>Date Added:</b>	May 19th, 2008
<b>Last Updated:</b>	May 19th, 2008
<b>Author:</b>	NetCreated
