## Magic Magnify

Hits: 765

**Description:** This neat tool reveals every detail in a product image by showing a close-up upon hover.

Move your mouse over the image, and a magnifying glass appears. It shows amazing detail.

It works by having two images - one small, one large. The JavaScript and Flash files work automatically to display the magnifying glass. No coding is needed - just clean HTML.

It is W3C valid HTML and it is totally accessible, so it still works if JavaScript is disabled.

### Resource Specifications

<b>Version:</b>	2.0
<b>Platform(s):</b>	linux, windows, freebsd, osx, sun
<b>Date Added:</b>	May 19th, 2008
<b>Last Updated:</b>	Sep 27th, 2008
