## Vista-like Ajax Calendar version 2

Hits: 2,120

**Description:** The Vista-like Ajax Calendar (vlaCalendar) version 2 is a unobtrusive web version of the slick and profound Windows Vista taskbar calendar, by using the mootools javascript framework, AJAX, XHTML, CSS and PHP.

Key features:

- o Authentic Vista look-and-feel
- o Quick navigation by jumping back and forth between months, years and decades without drop-down boxes
- o Smooth transition animations
- o Customizable features
- o Lightweight (compressed 8,50kB)

New features in version 2:

- o Datepicker functionality (!)
- o Cleaner and more developer centered - easily editable - CSS, PHP and javascript code
- o Easily changeable date labels (e.g. different languages)
- o Easily stylable. Styles are created on top of the general style; the download include two example styles
- o Both normal and datepicker calendar can be instantiated multiple times
