## Silentum RndImg

Hits: 799

**Description:** Silentum RndImg is the perfect PHP script if your site uses a dynamic banner or rotating images. By including one single PHP file, you can add as many images as you want to be rotated on each page load. PHP scripts don't get much easier than this. After inputting each image location at the top of the PHP file, all you have to do is include the file on each page you want the images to be rotated on.

### Resource Specifications
