Bot Detection with PHP

Hits: 269

Description: In this tutorial I will be showing step-by-step how to detect bots/crawlers with PHP. Bots or Crawlers, are basically search engines crawling around the internet. This is how you get your pages on search engines (well, a major way). Bot Detection isn't something super vital, but if your CMS or website already has practically everything, then you need Bot Detection.

Resource Specifications

Version:	1.0
Platform(s):	linux, windows, osx
