BreezingForms for Joomla! 1.5 (The new FacileForms) Hits: 227

Description: Because FacileForms is no longer under active development and not planned to be ported to Joomla! 1.5, we decided to fork and continue its development.

These are the new features so far:

- * Drag and Drop for form items and WYSIWYG editor surface
- * Custom CAPTCHA backgrounds now possible
- * Full Joomla! 1.5 language system compliance
- * Form item order now manageable by focusing instead only by using the arrow links
- * Syntax highlight editor for Javascript and PHP code
- * Joom!Fish 2.0 integration

Resource Specifications
