# Adminimizer Pro

Hits: 7,101

**Description:** Adminimizer Pro is a COM server component that creates an HTML editor inside a browser window. Full font, CSS style, and color control without needing to know HTML. Copy & Paste from MS Office while maintaining formatting. Easily control which formatting elements are available to users by setting a few properties. Spell checking, image properties and table editing are all supported. Button labels and tooltips are fully customizable for non-English speaking users.
