AddrBook

Hits: 6,756

Description: AddrBook is a simple, yet flexible web-based address book system. It lets people search the address book, look up entries alphabetically, or add themselves to the directory. (You may also disallow users from adding entries.) The admin user may delete entries, and change the admin password. In addition, when setting it up, you may choose to disable access to any of the search or lookup features and keep those password-protected.

Resource Specifications

Version:	1.0.10
Platform(s):	linux, windows, freebsd, sun
Price:	Freeware
