# Active Server Pages 3.0 by Example

Hits: 15,213

**Description:** ASP by Example assumes a basic knowledge of VBScript and teaches you how to create dynamic web sites quickly and easily. Using real-world examples, ASP 3 by Example teaches proper, accepted coding techniques that will cause fewer problems and allow you to apply your knowledge to more than simply the task at hand. Topics include: ASP, objects, cookies, applications, and database access.
