csGuestbook

Hits: 1,774

Description: csGuestbook is an automated script that allows the user to manage one or more guestbooks from one location. Features: Add, Modify, Delete and View your Guestbook(s) from one easy to understand management screen; Option to automatically purge guestbook entries after so many days; Option to Approve messages before they are posted to the guestbook; Email notification of new entries; Advanced style editing to change the look and feel as often as desired; Template capabilities that make it easy to incorporate a guestbook into your website site, and have each guestbook a look of it's own.

Resource Specifications

Platform(s):	linux, windows, freebsd, osx, sun
Price:	\$35
Date Added:	Jan 19th, 2001
Last Updated:	Nov 12th, 2008
Author:	Andy Angrick/Mike Barone

Average Visitor Rating:  **0.00** (out of 5)

Number of Ratings: 0 Votes

Average Member Rating:  **0.00** (out of 5)
