TinyPlayer

Hits: 6,545

Description: MP3 TinyPlayer is a free Applet on JavaZOOM's JavaLayer open source project. To play any MP3 file (e.g. : 44Khz, 128Kbps), you'll need Netscape 6 (i.e JVM 1.3 or higher with JavaSound API 1.0). It supports low bitrates (MPEG2.5) and it provides parameters to play automatically a song on applet loading.

Resource Specifications
