The best webring program out there now., Mar 6th, 2002

Reviewed By: reist

A lot of web ring programs have come and gone. Most of them for lack of support and some just for lack of quality. This one lacks neither. It has a whole support team ready to help and the quality is top rate. There's no reason anymore not to have exactly what you want in a web ring program. You have the option of installing it on your own web host for full control or simply adding it to an existing ring system.

Excellent GNU project with a devoted leader., Mar 21st, 2001

Reviewed By: wcvw

This project rose out of the ashes when Yahoo scrapped the WebRing.org system in favor of its barely tested prototype. The project is still in beta but has most of the features of the original system and a devoted team of developers is working hard to complete the job. It's better than several pay-for-use scripts and the price is right!
