# DB2ASP

Hits: 8,431

**Description:** DB2ASP converts and publishes your database to dynamic asp web pages. DB2ASP creates ASP, HTML, CSS, and JavaScript in minutes, saving hours or even days of work. You can view/add/edit/delete you data via any browser. DB2ASP is for non-programmers and programmers alike. Optional features: record sorting, paging, searching, images, JavaScript data validation, look and feel options, remote or local web servers, remote or local databases, multiple record deletion, drilldown, page execution timer, etc. Also provides advanced support for SQL Server and Oracle. Highly optimized for speed.

Check this out! This is a real time saver. I have my site hosted by a remote ISP. db2asp connected to my SQL Server at my ISP. It did everything - i used it to write a bunch of asp web admin pages.
