Count Click Throughs (With a Db)

Hits: 11,170

Description: Easily count and display the number of click through from your site with a database. Simply set all the links that you want to track to a single asp document and pass the URL as a querystring variable. The following example will display a page with a few links. Once a link is clicked on it will insert the URL and users IP address into an Access Db and redirect the browser to the URL clicked on. Included in the download is a document that will allow you to view people are clicking to in a number of ways.
