csImageFile

Hits: 15,578

Description: This ASP component resizes, edits and joins images. It supports JPG, GIF, BMP, PNG, PCX, PSD, TIF and WBMP files and can convert between them. Images can be exported to PDF. Create thumbnails and change JPG compression quality to reduce file size. Add text labels, draw lines and shapes with optional colour fills or antialiasing. Crop, Rotate, Flip and FloodFill commands available. Images can be joined by pasting one on top of another with optional full or partial transparency of the foreground image, including PNG alpha channels. Adjust brightness, contrast and sharpness. Import and export data from file, as a binary stream from a database or from a remote server. Read, write and edit IPTC text from JPG and TIF files. Extract and edit EXIF attributes from JPEG and TIFF files. Support for multi page TIFs. ICC colour profiles can be preserved. It can also read data from the csASPUpload component to process images uploaded through a browser. Free trial available with full instructions.
