# Javascript Menu Master

Hits: 37,356

**Description:** Create compact, attractive, and convenient Javascript-powered pull-down navigational menus for your web site with very little effort and absolutely no knowledge of writing complex Javascript and HTML code. The program gives you complete control over content, functionality, and appearance of your menus, including options for specifying style elements such as font, font size, colors, dimensions, and more in a smart, super-friendly, easy-to-use interface. Saving and loading menu project files allows for quick and easy updates of your menus should your site content change.

Resource Specifications	
Version:	2.5
